ABOUT

Full-stack developer at DevBrains, building production SaaS interfaces with React, Next.js and TypeScript on top of GraphQL APIs backed by NestJS, Prisma and PostgreSQL. I work in a domain-driven, feature-based codebase with typed GraphQL operations and a reusable component library, and deliver through Jira tickets, pull requests and code review in an Agile team. Outside work, I build MERN stack projects end to end, from schema design and REST APIs to deployed React interfaces.

EXPERIENCE

Frontend / Full-Stack Developer

DevBrains

09/2025 - Present Lahore

- Build production SaaS interfaces with React, Next.js and TypeScript, consuming GraphQL APIs backed by NestJS, Prisma and PostgreSQL.
- Develop feature-based frontend modules in a DDD-structured codebase using typed GraphQL operations generated through codegen.
- Maintain a reusable component library to keep the UI consistent across features.
- Deliver work through Jira tickets, pull requests and code review in an Agile team.

Business Development Manager

DevBrains

02/2024 - 08/2025 Lahore

- Managed lead research and outreach, and the company's presence on LinkedIn, Wellfound and Glassdoor, before returning to engineering with a stronger understanding of client needs.

Junior Web Developer

DevBrains

04/2023 - 01/2024

- Built and maintained responsive client websites in JavaScript and React; fixed bugs and delivered client change requests.

EDUCATION

BS Computer Science

University of Central Punjab (UCP)

2017 - 2022
